

PRIVATE LABEL SERVICES

With over 30 years experience of chemical blending and formulating, Chemfax has grown to be a thriving industry leader, distributing our products across Canada and overseas. Our products are used in various industries from fire fighting to wastewater treatment and from food processing to the oil and gas industry.

Chemfax currently has over 200 chemical products available and is constantly developing new ones. All these products are available for private label manufacture. Minimum quantities are required for all private label products, they are as follows:

205 litre drums	x 4
20 litre pails	x 36
4 litre containers	x 144
909 ml bottles	x 432

Other package sizes including bulk quantities in totes and tankers are also available.

Additional services that are offered include material safety data sheet and label preparation as well as custom packaging * screen printed pails and bags, in company colours with company logos.
